

STRETCHING FOR 1,200 MILES, THE NAMIB DESERT HAPPENS TO BE ONE OF THE OLDEST ON THE PLANET - AT LEAST 55 MILLION YEARS.

THE <u>MOJAVE DESERT</u> COVERS PORTIONS OF SOUTHEASTERN <u>CALIFORNIA</u> AND SOUTHERN <u>NEVADA</u>, ALONG WITH SMALL SECTIONS OF NORTHWESTERN ARIZONA AND SOUTHWESTERN UTAH.

WINTER DARKNESS, COLD, ICE - THESE MIGHT BE SOME OF THE WORDS USED TO DESCRIBE THE CONTINENT OF <u>ANTARCTICA</u>. BUT, DID YOU KNOW YOU CAN ADD DESERT TO THAT LIST? ANTARCTICA DOES NOT SEE ENOUGH PRECIPITATION TO QUALIFY AS ANYTHING OTHER THAN A DESERT.

SPREAD OVER PORTIONS OF <u>ARIZONA</u>, CALIFORNIA, AND <u>MEXICO</u>, THE SONORAN DESERT IS A BEAUTIFUL LANDSCAPE BRIMMING WITH ENDEMIC FAUNA AND FLORA, INCLUDING THE SAGUARO AND ORGAN PIPE CACTI.

ONCE A PRE-HISTORIC LAKE KNOWN AS LAGO MINCHÍN, IT COVERED SOUTHWEST <u>BOLIVIA</u>, AND WHEN IT DRIED UP, IT LEFT BEHIND THE WORLD'S LARGEST SALT FLATS, MEASURING 4,633 SQUARE MILES.

ONE OF THE LARGEST DESERTS IN NORTH AMERICA – SPREAD OVER 175,000 SQUARE MILES – THE CHIHUAHUAN DESERT HAS SOME INCREDIBLE FLORA AND FAUNA, INCLUDING THE ARIZONA RAINBOW CACTUS AND GRAY FOX.
